landcape.***

Opening Spring Special!!
Bale contains 5.5 + cubic yards of mulch.
\$247.50 per bale. \$45.00 per cubic yard.

“RootZone” - Landscape Blend

RootZone Landscape Blend is a compost based organic soil without the addition of native topsoil. This unique blend combines our NatureMade Compost with peat moss and garden sand to form a ready-to use soil-less growing medium. The composted material used in the production of this material is virtually weed free. It contains beneficial microbes, and macro and micro nutrients that are essential for plant growth. RootZone Landscape Blend is a consistent soil that is workable in all weather conditions and provides an alternative to traditional soils. Without the native soil, this product is essentially weed free.

USES

- A great soil for new and raise beds
- On commercial and residential sites
- Flower gardens and vegetable gardens
- As a base for sod or seeded areas
- Ideal for pot and container gardening
